Kære Niels Sandø,

Jeg fremsender hermed link til en ny publikation om vaping fra det britiske National Health Service (NHS).

Her afkræfter NHS en række myter om brugen af nikotin: <https://www.nhs.uk/better-health/quit-smoking/vaping-to-quit-smoking/vaping-myths-and-the-facts/>

NHS slår bl.a. fast, at:

- Nicotine vaping is not risk-free, but it is substantially less harmful than smoking.
- Although nicotine is addictive, it is relatively harmless to health
- Nicotine vapes are one of the most effective stop smoking aids
- While vapes contain the same addictive substance as cigarettes, vaping nicotine is far less harmful
- There is no evidence so far that vaping is harmful to people around you.
- A UK standard disposable vape delivers a similar amount of nicotine as 20 cigarettes.

Med venlig hilsen
Christopher Arzrouni
