

Characteristics of studies

Characteristics of excluded studies

Bergamin 2014

Reason for exclusion	Wrong patient population
----------------------	--------------------------

Carson 2014

Reason for exclusion	Did not provide additional information
----------------------	--

Carson 2016

Reason for exclusion	Wrong patient population
----------------------	--------------------------

Chantepie 2017

Reason for exclusion	Wrong intervention
----------------------	--------------------

De 2015

Reason for exclusion	Data in metaanalysis
----------------------	----------------------

Desborough 2017

Reason for exclusion	Wrong outcomes
----------------------	----------------

Hoeks 2017

Reason for exclusion	Did not provide additional information
----------------------	--

Liu 2015

Reason for exclusion	Did not provide additional information
----------------------	--

Mear 2014

Reason for exclusion	Wrong intervention
----------------------	--------------------

Roubinian 2016

Reason for exclusion	Did not provide additional information
----------------------	--

Stanworth 2017

Reason for exclusion	Did not provide additional information
----------------------	--

Yakymenko 2015

Reason for exclusion	Wrong patient population
----------------------	--------------------------

Footnotes

References to studies

Excluded studies

Bergamin 2014

Bergamin F.; Almeida J.; Park C.; Osawa E.; Silva J.; Galas F.; Nagaoka D.; Fukushima J.; Vieira S.; Candido L.; Oshiro C.O.; Vincent J.L.; Hajjar L.. Transfusion requirements in septic shock patients: A randomized controlled trial. *Critical Care* 2014;18(Journal Article):S39. [DOI: <http://dx.doi.org/10.1186/cc13302>]

Carson 2014

Carson, Jeffrey L.; Strair, Roger. Transfusion strategies in hematologic and nonhematologic disease. *Hematology.American Society of Hematology.Education Program* 2014;2014(1):548-52. [DOI: <https://dx.doi.org/10.1182/asheducation-2014.1.548>]

Carson 2016

Carson J.L.; Guyatt G.; Heddle N.M.; Grossman B.J.; Cohn C.S.; Fung M.K.; Gernsheimer T.; Holcomb J.B.; Kaplan L.J.; Katz L.M.; Peterson N.; Ramsey G.; Rao S.V.; Roback J.D.; Shander A.; Tobian A.A.R.. Clinical practice guidelines from the AABB: Red blood cell transfusion thresholds and storage. *JAMA - Journal of the American Medical Association* 2016;316(19):2025-2035. [DOI: <http://dx.doi.org/10.1001/jama.2016.9185>]

Chantepie 2017

Chantepie, Sylvain P.; Mear, Jean-Baptiste; Parienti, Jean-Jacques; Bazin, Agnes; Benabed, Khaled; Cheze, Stephane; Gac, Anne-Claire; Johnson-Ansah, Hyacinthe; Macro, Margaret; Cabrera, Quentin; Reboursiere, Emilie; Lancesseur, Charles; Damaj, Gandhi; Reman, Oumedaly. Blood transfusion in hematologic intensive care unit. *Transfusion* 2017;57(2):296-302. [DOI: <https://dx.doi.org/10.1111/trf.13908>]

De 2015

De, Zern A.; Williams K.; King K.E.; Hand W.; Levis M.J.; Smith B.D.; Gojo I.; Pratz K.W.; Gondek L.P.; Prince G.T.; Ghiaur G.; Showel M.M.; Gladstone D.; Frank S.; Ness P.M.. Liberal vs. restrictive transfusion thresholds in leukemia patients: A feasibility pilot study. *Blood* 2015;126(23):771. [DOI:]

Desborough 2017

Desborough M.J.R.; Colman K.S.; Prick B.W.; Duvekot J.J.; Sweeney C.; Odutayo A.; Jairath V.; Doree C.; Trivella M.; Hopewell S.; Estcourt L.J.; Stanworth S.J.. Effect of restrictive versus liberal red cell transfusion strategies on haemostasis: Systematic review and meta-analysis. *Thrombosis and haemostasis* 2017;117(5):889-898. [DOI: <http://dx.doi.org/10.1160/TH17-01-0015>]

Hoeks 2017

Hoeks, Marlijn P. A.; Kranenburg, Floris J.; Middelburg, Rutger A.; van Kraaij, Marian,G.J.; Zwaginga, Jaap-Jan. Impact of red blood cell transfusion strategies in haemato-oncological patients: a systematic review and meta-analysis. *British journal of haematology* 2017;178(1):137-151. [DOI: <https://dx.doi.org/10.1111/bjh.14641>]

Liu 2015

Liu, Chang; Grossman, Brenda J.. Red blood cell transfusion for hematologic disorders. *Hematology.American Society of Hematology.Education Program* 2015;2015(Journal Article):454-61. [DOI: <https://dx.doi.org/10.1182/asheducation-2015.1.454>]

Mear 2014

Mear J.-B.; Chantepie S.; Gac A.-C.; Bazin A.; Reman O.. A restrictive strategy reduces the number of transfused packed red blood cells in allograft recipients. *Blood* 2014;124(21). [DOI:]

Roubinian 2016

Roubinian N.; Carson J.L.. Red Blood Cell Transfusion Strategies in Adult and Pediatric Patients with Malignancy. *Hematology/oncology clinics of North America* 2016;30(3):529-540. [DOI: <http://dx.doi.org/10.1016/j.hoc.2016.01.001>]

Stanworth 2017

Stanworth S.J.. Red cell and platelet transfusion in haematological malignancies-where do we stand? *Transfusion Medicine* 2017;27(Journal Article):17. [DOI: <http://dx.doi.org/10.1111/tme.12416>]

Yakymenko 2015

Yakymenko D.; Frandsen K.B.; Christensen I.J.; Norgaard A.; Johansson P.; Daugaard G.; Sorensen M.. Heamoptimal: Randomized feasibility study of the optimal hemoglobin trigger for red blood cell transfusion to anemic cancer patients treated with chemotherapy. *Supportive Care in Cancer* 2015;23(1):S275. [DOI: <http://dx.doi.org/10.1007/s00520-015-2712-y>]
