

### Guidelines databaser:

#### **G-I-N International** (Kræver medlemskab)

[International Guidelines Library - GIN \(g-i-n.net\)](http://www.g-i-n.net)

The Guidelines International network, G-I-N, is a global network, founded in 2002. It has grown to comprise 88 organizations and 110 individual members representing 48 countries from all continents (October 2012). The network supports evidence-based health care and improved health outcomes by reducing inappropriate variation throughout the world. G-I-N mission..... to lead, strengthen and support collaboration and work within the guideline development, adaptation and implementation community. The database "International Guidelines Library" consist of 3000 guidelines and is searchable.

#### **NICE (UK)**

<http://www.nice.org.uk/>

The National Institute for Health and Clinical Excellence (NICE) was set up in 1999 to reduce variation in the availability and quality of NHS treatments and care - the so called 'postcode lottery'.

NICE is here to help those working in the NHS, local authorities and the wider community deliver high-quality healthcare. Developing evidence-based guidelines on the most effective ways to diagnose, treat and prevent disease and ill health. Patient-friendly versions of our guidelines can help educate and empower patients, carers and the public to take an active role in managing their conditions. An easy way to reach a guideline is by clicking on "Conditions and Diseases" in the green box and follow the menu.

#### **Scottish Intercollegiate Guidelines Network (SIGN)**

[www.sign.ac.uk](http://www.sign.ac.uk)

The Scottish Intercollegiate Guidelines Network (SIGN) develops evidence based clinical practice guidelines for the National Health Service (NHS) in Scotland. SIGN guidelines are derived from a systematic review of the scientific literature and are designed as a vehicle for accelerating the translation of new knowledge into action to meet our aim of reducing variations in practice, and improving patient-important outcomes.

#### **TRIP**

<https://www.tripdatabase.com/>

Trip is a clinical search engine designed to allow users to quickly and easily find and use high-quality research evidence to support their practice and/or care. Trip has been online since 1997 and in that time has developed into the internet's premier source of evidence-based content.

As well as research evidence it also allow clinicians to search across other content types including images, videos, patient information leaflets, educational courses and news.

Trip became incorporated (a limited company) in 2001 with the two shareholders being Jon Brassey and Dr Chris Price. They remain the sole shareholders.

#### **SBU, Sverige**

<http://www.sbu.se/sv/>

## SUNDHEDSSTYRELSEN

The Swedish Council on Health Technology Assessment is known internationally by its Swedish acronym, SBU. For more than fifteen years, SBU has stayed on the leading edge of health technology assessment (HTA).

### **Socialstyrelsen, Sverige**

[www.socialstyrelsen.se](http://www.socialstyrelsen.se)

Socialstyrelsen är en statligmyndighet under Socialdepartementet och har en mycket bred verksamhet som rörsocialtjänst, hälso- ochsjukvård, hälsoskydd, smittskydd och epidemiologi.

### **Folkehelseinstituttet**

<https://www.fhi.no/>

Folkehelseinstituttet er eit statleg forvaltingsorgan underlagt Helse- og omsorgsdepartementet. Folkehelseinstituttet er en beredskaps- og kunnskapsorganisasjon. Samfunnsoppdraget er å produsere, oppsummere og kommunisere kunnskap for å bidra til godt folkehelsearbeid og gode helse- og omsorgstjenester. På denne måten bidrar Folkehelseinstituttet til bedre helse i Norge og globalt. Instituttet arbeider faglig uavhengig og bygger på verdiene faglig solid, nyskapende, åpen, respektfull og samarbeidende. Instituttets oppdragsgivere og brukere er helsemyndigheter og andre myndigheter nasjonalt, regionalt og i kommunene, helse- og omsorgstjenestene, befolkningen generelt, pasientgrupper, frivillige organisasjoner, interesseorganisasjoner, media, universitets- og høyskolesektoren og forskningsinstitutter, næringslivsaktører, internasjonale organisasjoner og andre

### **Helsedirektoratet, Norge**

<http://www.helsedirektoratet.no/>

Helsedirektoratet er et fagdirektorat og myndighetsorgan som ligger under og bliver etatsstyret af Helse- og omsorgsdepartementet. Helsedirektoratet har også oppgaver fra Kommunal- og regionaldepartementet.

### **Center for kliniske retningslinjer**

<http://cfkr.dk/>

Center for Kliniske Retningslinjer blev etableret efter en konsensuskonference arrangeret af Det Nationale Dokumentationsråd nedsat af Dansk Sygepleje Selskab i 2008.

Center for Kliniske Retningslinjer er en institution, der samler, organiserer, filtrerer og vurderer viden og information, der er produceret af andre. Målet er at fastslå, hvad der kan regnes for sikker, kvalificeret viden til brug for politiske beslutningstagere, forskere, udviklere og praktikere.

### **Medicinske databaser:**

#### Kommercielle databaser

#### **Medline**

MEDLINE is the U.S. National Library of Medicine's® (NLM) premier bibliographic database.

MEDLINE is the primary component of PubMed®, part of the Entrez series of databases provided by the NLM National Center for Biotechnology Information (NCBI). Coverage: generally 1946 to the present, with some older material.

## SUNDHEDSSTYRELSEN

### **Embase**

Embase is a biomedical and pharmacological database containing bibliographic records with citations, abstracts and indexing derived from biomedical articles in peer reviewed journals, and is especially strong in its coverage of drug and pharmaceutical research. Coverage 1974-present. Embase is produced by Elsevier

### **Cinahl**

Databasen CINAHL (Cumulative Index to Nursing and Allied Health Literature) indeholder referencer til artikler i sygeplejefaglige tidsskrifter (700 tidsskrifter) og andre sundhedsfaglige tidsskrifter blandt andet indenfor fagene ergoterapi, fysioterapi, jordemoderkundskab, radiografi, og ernæring.

Udarbejdes af Cinahl Information Systems (EBSCO)

### **PsycInfo**

The American Psychological Association's PsycINFO® database is the comprehensive international bibliographic database of psychology. Journal coverage, spanning 1806 to present

### Ikke kommercielle databaser

#### **PubMed**

Gratis-udgaven af Medline.

#### **The Cochrane Library**

<http://cochranelibrary.com>

The Cochrane Collaboration is an international network of more than 28,000 dedicated people from over 100 countries. We work together to help healthcare providers, policy-makers, patients, their advocates and carers, make well-informed decisions about health care, by preparing, updating, and promoting the accessibility of Cochrane Reviews. Cochrane Library consists of several subdatabases, i.e. Cochrane Database of Systematic Reviews and Cochrane Central with randomized studies from Medline, Embase and Special Registers. Cochrane Library also enholds the largest collections of links to trials, including clinicaltrials.gov, trials conducted in the EU, and trials within WHO member states, searchable in Cochrane Central.

#### **Epistemonikos**

<https://www.epistemonikos.org/>

Epistemonikos is a collaborative, multilingual database of health evidence. It is the largest source of systematic reviews relevant for health-decision making, and a large source of other types of scientific evidence. Epistemonikos was founded by Gabriel Rada and Daniel Pérez. Many institutions and hundreds of collaborators are involved in different aspects, and most of them contribute without an economic retribution. It is now maintained by Epistemonikos foundation, a not for profit organization based in Santiago, Chile.

#### **SveMed+**

<http://svemedplus.kib.ki.se/>

SveMed+ er en bibliografisk database, der indeholder referencer til artikler fra skandinaviske tidsskrifter inden for det sundhedsfaglige område. Links til fuldtekst forekommer. Godt supplement til søgning i PubMed. OBS! Siden januar 2020 er databasen ikke opdateret.

#### **Clinical Trials.gov**

<https://clinicaltrials.gov/>

ClinicalTrials.gov is a Web-based resource that provides patients, their family members, health care professionals, researchers, and the public with easy access to information on publicly and privately supported clinical studies on a wide range of diseases and conditions. The Web site is maintained by the National Library of Medicine (NLM) at the National Institutes of Health (NIH). Information on ClinicalTrials.gov is provided and updated by the sponsor or principal investigator of the clinical study. Studies are generally submitted to the Web site (that is, registered) when they begin, and the information on the site is updated throughout the study. In some cases, results of the study are submitted after the study ends. This Web site and database of clinical studies is commonly referred to as a "registry and results database"

#### **PEDro**

[www.pedro.fhs.usyd.edu.au/](http://www.pedro.fhs.usyd.edu.au/)

Systematic reviews and appraised randomized trials in physiotherapy (free on the internet).

#### **OTseeker**

[www.otseeker.com](http://www.otseeker.com)

Systematic reviews and appraised randomized trials in occupational therapy. (Free on the internet).

#### **EPPI-Centre**

<https://eppi.ioe.ac.uk/cms/>

Database of health promotion research (free on the internet).

### **Generelle databaser:**

#### **Bibliotek.dk**

<https://bibliotek.dk/da>

Bibliotek.dk er en database over hvad der findes på danske offentlige biblioteker. Du kan se hvilket bibliotek der har materialer hjemme eller bestille materialer direkte.

#### **NORA – Den danske forskningsportal**

<https://forskningsportal.dk/local/search/>

Alle danske forskningspublikationer fra universiteter, professionshøjskoler, CBS, VIVE, DIIS

#### **LIBRIS**

<http://libris.kb.se/>

Søgetjenesten Libris indeholder mere end 7 millioner titler fra ca. 400 svenske biblioteker (universitets-, høgskole- og forskningsbiblioteker samt et varierende antal folkebiblioteker). Her findes bøger, tidsskrifter,

artikler, kort, plakater, noter, elektronisk publiceret materiale m.m. Libris indeholder desuden en stor mængde deldatabaser indenfor forskellige områder.

#### **SwePub**

<https://kb.se/swepub>

Swepub samler metadata om forskningspublikationer från svenska lärosäten i form av vetenskapliga artiklar, böcker, avhandlingar, konferensbidrag, bokkapitel, rapporter, konstnärliga arbeten med mera.

#### **Cristin**

<https://www.cristin.no/>

Cristin (Current Research Information System in Norway) er et fælles system til registrering og rapportering af forskningsaktiviteter for institutioner i bl.a. sundhedssektoren. Forskning fra norske forskere, er som regel allerede publiceret og dermed registreret i Oria.no, men der kan være forskelle.

#### **Prospero**

<https://www.crd.york.ac.uk/prospero/>

PROSPERO is an international database of prospectively registered systematic reviews in health and social care, welfare, public health, education, crime, justice, and international development, where there is a health related outcome. Key features from the review protocol are recorded and maintained as a permanent record. PROSPERO aims to provide a comprehensive listing of systematic reviews registered at inception to help avoid duplication and reduce opportunity for reporting bias by enabling comparison of the completed review with what was planned in the protocol. PROSPERO is produced by CRD and funded by the National Institute for Health Research (NIHR)

#### **HTA database (INAHTA)**

<https://database.inahta.org/>

The international HTA database provides free access to bibliographic information about ongoing and published health technology assessments commissioned or undertaken by HTA organisations from around the world. This includes INAHTA members and non-INAHTA members. The database provides a single point of access to information that would otherwise be more difficult and time-consuming to search for on individual agency websites.

INAHTA has taken on the responsibility for the production of the HTA database. This was previously done by the Centre for Reviews and Dissemination (CRD), University of York, England. The database was started by the CRD in 1996 and, in fact, it used the INAHTA Briefs as a seed database for the new international platform.

#### **Health Systems Evidence, HSE**

<https://www.healthsystemsevidence.org/>

Health Systems Evidence is a continuously updated repository of syntheses of research evidence about governance, financial and delivery arrangements within health systems, and about implementation strategies that can support change in health systems. The types of syntheses include evidence briefs for policy, overviews of systematic reviews, systematic reviews, systematic reviews in progress (i.e., protocols for systematic reviews), and systematic reviews being planned (i.e., registered titles for systematic reviews). Health Systems Evidence also contains a continuously updated repository of economic

evaluations in these same domains, descriptions of health system reforms (with links to syntheses and economic evaluations when possible), and descriptions of health systems (to assist with assessments of the local applicability of research evidence and of how reforms are embedded within health systems).  
other advanced features

**Andre resourcer:**

**CDC**

<https://www.cdc.gov/>

CDC is the nation's leading science-based, data-driven, service organization that protects the public's health. For more than 70 years, we've put science into action to help children stay healthy so they can grow and learn; to help families, businesses, and communities fight disease and stay strong; and to protect the public's health.

**EMA**

<https://www.ema.europa.eu/en>

The mission of the European Medicines Agency (EMA) is to foster scientific excellence in the evaluation and supervision of medicines, for the benefit of public and animal health in the European Union (EU).

**ERIC**

[www.eric.ed.gov/](http://www.eric.ed.gov/)

Provides free access to millions of bibliographic records of journal articles and other education-related materials, such as journal articles, books, research syntheses, conference papers, technical reports, policy papers and other education-related materials. ERIC has special collections from the What Works Clearinghouse and the Regional Educational Laboratories, and also provides full-text access to grey literature, ranging from informational materials to researched and reviewed documents, including research syntheses, conference papers, and policy reports.
